AEG

IN THE PERFECT HOME

ELECTRICAL RETAIL PRODUCT RANGE 2017

AFTER SALES SUPPORT / CUSTOMER CARE

WARRANTY

AEG appliances come with a 12 month warranty from date of purchase.
When you register your new appliance your warranty will be extended to 2 or 5 years (depending on model). During your warranty period you are protected against the cost of parts, call-out and labour charges. All work is carried out by our national network of approved AEG engineers.

You can register your appliance by completing the warranty registration card enclosed with your appliance, calling our dedicated warranty registration phone number printed on the card, or online at www.aeg.co.uk

For additional peace of mind you have the option to extend your guarantee even further with our AEG Protection Plan. You'll be protected against damage caused by accident from the moment you join and if one of our approved engineers can't fix it, you could receive a brand new replacement. This coverage is provided by our specialist insurers Domestic and General.

To find out more visit www.aeg.co.uk or call 0800 479 0775

CUSTOMER SERVICE

Should you need to contact us about your product we have a dedicated AEG customer service team to help. Our team is based in the AEG UK head office and can be contacted by phone on 03445 611 611 or via www.aeg.co.uk

LOCAL SERVICE, NATIONWIDE

Our national network of Service Force agents provide product maintenance, genuine parts and repairs for all AEG Major Appliances. Genuine AEG parts ensure you continue to experience the excellent performance you expect from your AEG product.

If you require a visit from one of our agents for your Major Appliance please call our Service Force team on 03445 616 616.

IN THE PERFECT HOME, YOU'RE IN COMPLETE CONTROL

Welcome to AEG's kitchen and laundry range. Inside every appliance, you'll find intelligent technology and responsive design, guaranteeing you exceptional performance and results time after time. You'll discover that one touch redefines what's possible at home.

We innovate so that you can elevate what you do to new heights every day.

WE ARE PIONEERS WITH A VISION

We thrive upon innovation designed to give you the ultimate feeling of mastery in your home and laundry care. We see your needs of today. And foresee the ones of tomorrow. So that you can achieve results that don't just meet your standards, but exceed them.

We believe in intelligent technology and exceptional performance, helping you to take anything you do at home to the next level, every day.

We are proud of our distinctive engineering and responsive design, guaranteeing you the performance you expect and deserve.

We are a brand that people turn to for intelligent and exciting new ways to guarantee their outcome.

This has been our passion for over 125 years, and continues to be our passion today.

We are AEG.

And together with you, we are always an idea ahead.

CONTENTS

FLAVOUR.
CONDUCTED YOUR WAY.

The new Mastery Range from AEG works with you in unique ways to take your cooking to the next level. Every appliance ready to play their part, working in harmony and instantly responding to your second-by-second commands.

Now, for the first time, you can even tell the oven how you want your dish cooked – using just the words you would in a restaurant – rare, medium, well done. Or play with a hob where the entire surface follows every pan you move, no matter how big or small. It's time to expect more from the way you cook. Step into the world's most responsive cooking experience.

MAESTRO, YOUR
KITCHEN IS WAITING.

REFRIGERATION

Flavour is all about freshness and storing ingredients – the right humidity and temperature is vital. But how do you want your fridge arranged? Our solution lets you decide. Everything and anything fits in perfectly for long-lasting flavour.

Space management
Adaptable to your taste.

Taste and texture
Nature's freshness preserved.

Energy efficiency
Take care of the environment
and your household budget.

REFRIGERATION WHAT'S NEW

Create your own perfectly organised fridge with the CustomFlex® storage system. This unique and practical innerdoor storage system allows you to arrange shelves, clips and compartments in all shapes and sizes in hundreds of different layouts, so there's always one that works best for you at any time.

ADAPTABLE FOR EVERY TASTE
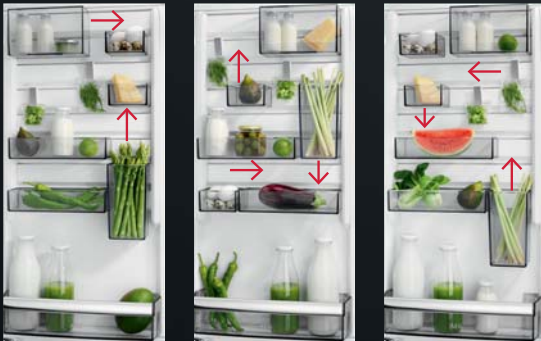

CustomFlex®
CustomFlex® enables you to move and rearrange compartments quickly and easily to maximize storage space.

Retractable lower shelf
for flexible storage.

Self-closing door
An elegant solution, with no risk of
slamming. Automatically closes from
an opening angle of 25–30 degrees.

High Efficiency LED lighting
ensures a good spread of light,
shining downwards in the fridge.
An intelligent fan function prevents
warm areas in the upper part of
the fridge and creates an even
temperature in all fridge levels.

A⁺⁺⁺

Did you know?
Our appliances are leaders
in energy performance, with
the highest ratings of up to
A+++ -20% energy saving.

Display
Touch controls with new
white LED digital display.

REFRIGERATION WORTH KNOWING

Precision chilling for exceptional cooking. Carefully sourced ingredients need exact conditions to preserve their greatness. Our Zero Degree compartments make it possible to create different chilling conditions in each part of your refrigerator. Adjust each drawer's temperature at a touch.

Without Zero Degree

With Zero Degree

Without Zero Degree

With Zero Degree

Top:
Ripe vegetables.

Bottom:
Fish and meat that require more humidity and lower temperature.

Door:
Glass jars, cans and drinks.

Exceptions:
Potatoes and apples are best stored outside the fridge.

AEG TwinTech® technology
Unlike conventional fridge freezers that use cold, ultra-dry air from the freezer and recirculate it to cool the fridge, TwinTech® Plus units have two separate cooling systems. This provides the ideal humidity in each compartment, preventing food from drying out in the fridge and delivering frost-free storage in the freezer.

Nature's flavours in peak condition
When each ingredient and element of your cooking is carefully chosen, they need to remain at their best until you come to use them. With the TwinTech+ system, carefully selected temperature and humidity levels are maintained with minimal fluctuations. So, your produce is not subjected to the variations that cause its quality to deteriorate. Your ingredients are chilled in peak conditions – fruits and vegetables stay crisp and bursting with flavour, meat and fish stay vibrant. From the moment you choose them to the moment they reach your plate.

CUSTOMFLEX® | SCE81864TC

ADAPTABLE FOR EVERY TASTE

CustomFlex® a unique storage system that allows you to organise your fridge just the way you want. Move and rearrange compartments quickly and easily to maximise storage space. Keeping all your fresh ingredients to hand is key to creating fresh, delicious dishes. Clips for herbs, clear boxes for cheeses, secure shelves for dairy, sauces and condiments. All positioned exactly where you want them to be. Finally a fridge that adapts to your taste.

INTEGRATED LONG FRESH FRIDGE
SKS81826ZC

KEY FEATURES

LongFresh	Dynamic air	Soft close door	touch controls

The LongFresh feature is a zero degree compartment with adjustable temperature settings & separate humidity. To maintain the deep blushing crimson of a fillet of beef, to ensure the sweet freshness of a lobster tail, or to hold the ultimate flavour of fresh fruit they must be treated and chilled with precision. The two Zero Degree compartments in the AEG refrigerator allow you to choose and adjust the humidity and temperature settings in each drawer. Ensure that each element is at peak condition, by chilling them in unique conditions.

DynamicAir technology maintains the airflow inside the fridge, ensuring consistent temperature at every shelf so that your ingredients stay fresh.

CUSTOM FLEX FRIDGE FREEZER

RCB53724MX/MW

KEY FEATURES

2 YEAR GUARANTEE

Custom flex | **Multi-airflow** | **TwinTech®** | **No frost**

The AEG Customflex refrigerator allows you to organise your fridge storage just the way that you want, so all your fresh ingredients are to hand when creating delicious dishes.

The Multiairflow technology provides the precise temperature and humidity your ingredients need to stay fresh throughout your fridge, nutritious and full of flavour for even longer.

With the pioneering TwinTech® technology for exceptional freshness. One cooling system chills the freezer, keeping it No frost. The other cools the fridge, ensuring that the fridge temperature is cold, stable and with the correct level of humidity.

Never defrost your freezer again. No frost freezers also offer efficient and effective freezing with quicker, more even freezing for better food preservation.

OVENS

However you like to cook and whatever your favourite dishes, there's an AEG oven that's just right for you. Featuring our intelligent technology, every oven makes it effortless and enjoyable to create great tasting food, exactly the way you like it.

SteamBoost
Turn flavour up to full.

SteamPro
Master even the most
complex flavours.

SurroundCook®
Expect even, every time.

SteamCrisp
Steam. Your new standard for flavour.

SteamBake™
Add steam for
crispier baking.

SenseCook®
Rare. Medium. Well done.
At your command.

OVENS
WHAT'S NEW

The latest furniture trends are becoming more linear and we have designed our products in line with that. We've also included more glass and less stainless steel for a seamless finish.

Command wheel
An innovative Command Wheel removes the need for a busy dashboard and makes the cooking experience simple and streamlined for perfection on a plate, every time.

Humidity sensor
Our unique humidity sensor automatically ensures you introduce the exact amount of steam into your dishes for perfect taste and texture.

LCD display

With just a touch, your current cooking settings appear immediately on the clear colour LCD display for at-a-glance monitoring of your meal, making adjustments exact and precise.

Food Sensor

Rare   Medium   Well Done

By precisely measuring the core temperature of your food, the Food Sensor lets you know when your rare, medium or well done meat is ready. As well as cooking fish, casseroles and vegetables just the way you like them.

OVENS
WORTH KNOWING

For the first time, you can trust that your oven understands the result you want, just from the words you choose.

Why steam?

- **Prevents flavour exchange**
  Stops flavour exchange between different dishes.

- **Food stays moist**
  Prevents food from drying out.

- **Preserves nutrients**
  Preserves nutrients, vitamins and minerals.

- **Evenly cooked**
  Cooks food more evenly from surface to core.

- **More efficient**
  Delivers heat more efficiently to the food than dry, hot air, so the temperature can be lower.

MASTER A NEW LEVEL OF FLAVOUR. JUST ADD STEAM TO HEAT.

By adding steam to traditional heat, our range of ovens ensures your dishes are cooked to your exact preference. The combination of heat and steam delivers crisp and golden on the outside and juicy and succulent on the inside – every single time. It's an uncomplicated and highly effective way of ensuring that everything you cook is packed with maximum flavour.

STEAMCRISP

Grill **Steam plus Hot Air**

STEAMBOOST

Poached **FullSteam**

STEAMPRO
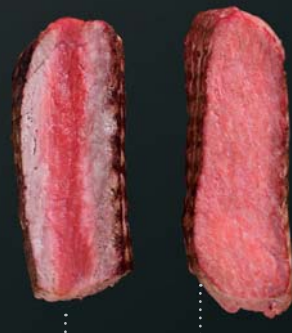

Grill **SousVide**

SURROUNDCOOK®

Standard oven **SurroundCook® oven**

The SurroundCook® oven ensures that every part of your dish is getting exactly the heat it needs. Evenly. Consistently. Wherever it's placed. Whether it's one dish or several. No more turning dishes halfway through cooking. Just the results that meet your expectations.

SOUSVIDE OVEN WITH COMMAND WHEEL CONTROL | BSE892330M

INDUCTION COOKING

FREESTANDING COOKING WORTH KNOWING

Standard oven   **SurroundCook® oven**

SURROUNDCOOK®

The SurroundCook® oven ensures that every part of your dish is getting exactly the heat it needs. Evenly. Consistently. Wherever it's placed. Whether it's one dish or several. No more turning dishes halfway through cooking. Just the results that meet your expectations.

FOOD SENSOR

By precisely measuring the core temperature of your food, the Food Sensor lets you know when your rare, medium or well done meat is ready. As well as cooking fish, casseroles and vegetables just the way you like them.

Food Sensor

Rare   Medium   Well Done

XXL CAVITY

Our large main oven has more usable space which allows you to cook on all 5 levels simultaneously, which means you can bake 150 cookies at the same time.

CATALYTIC LINING

The Catalytic lining oxidises grease and dirt within both ovens, aiding oven cleaning.

INDUCTION COOKING | 49176IW-MN

FREESTANDING COOKING

Our MaxiSense® induction hob has flexible sections ensuring pots and pans have maximum space and choice of position. The 4 zones can be switched to 2 large cooking areas, ideal for large pans or fish kettles.

Stop + Go allows you to reduce all the hob zones to Keep Warm setting and back again - all at the touch of a button. Ideal for unexpected interruptions.

Touch controls for both hob and oven functionality offer precise operation, give a flush finish to the cooker and are easy to wipe clean.

To help you reach perfection the food probe measures the precise temperature deep inside the food.

HOODS

Our cooking environments need to be fresh, bright and peaceful, enriching the time that we spend there. We use advanced technology to ensure that the design and build of our cooker hoods give you the optimum combination of high-end design and powerful functionality.

Enjoyable ambience
Creating the perfect setting.

Assisted convenience
Supporting you automatically.
Just when you need it.

Architectural solutions
A subtle or a bold
statement. Your choice.

Performance
Performance you can rely on.

HOODS
WHAT'S NEW

AEG's intelligent Hob²Hood System ensures your hood works in harmony with your hob as soon as you turn your hob on. A wireless signal is sent to the hood, switching on the lights and providing optimal visibility.

Our new premium and modern user interface combines super responsive capacitive touch buttons along with back lit white LED indicators. The LED turns red to show which feature is on or off.

Dimmable LED
Provides the possibility to adjust the intensity of the light according to your needs, creating the perfect ambient illumination in your kitchen.

SilenceTech
Our more advanced hood technology reduces the noise level down to the lowest number of decibels so that you can cook powerfully and enjoy the experience without loud sounds from the appliance.
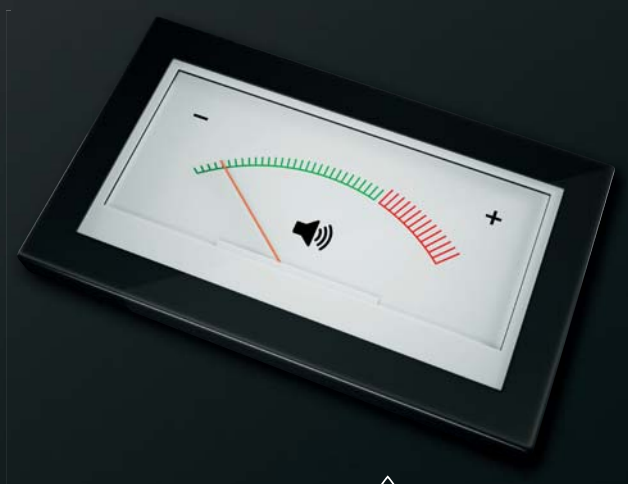

Aligned across our range, your choice of hood will integrate seamlessly with any of our hob models. Our top line models feature our signature flow line for design harmony, together with a sophisticated white LED display on layered glass and metal.

Run it for less energy
Our hoods are highly efficient, using less energy than standard models. This is thanks to our brushless Inverter Technology. In fact, when you run the hood at its maximum speed, you'll use up to 40% less energy than standard models. And at the minimum setting, it needs less energy to run than a standard light bulb.

HOODS
WORTH KNOWING

Depending on the model, our high-performance hoods filter air and either expel it outside or clean and recycle it back into the kitchen.

EXTRACTION VERSUS RECIRCULATION

Almost all hoods can use a venting or recirculating setting.

Venting Hoods
Air is drawn in through the hood's fan and passes through its grease filter. The air is then directed outside through the exhaust duct in the roof. Fresh air must be supplied to prevent negative pressure.

Recirculating Hoods
In some homes, air cannot be expelled outdoors for structural reasons. If this is the case, it is particularly important that you have a high-quality hood with a reliable filtration system. Recirculating hoods draw in air that passes through a grease filter and a carbon filter, before being conveyed back into the kitchen. As this method includes no air from outside, it's important to ventilate the room briefly after cooking to prevent excess moisture building up.

MAINTENANCE

To ensure consistent performance, it's important to replace your hood's filters regularly. Hoods depending on installation (venting or filtering), have grease filters or grease and charcoal filters. The grease filter is in the bottom and is the first to filter the air. The charcoal filter is mounted on the motor. Grease filters must be cleaned once a month, charcoal filter every 3-4 months.

As an alternative to our standard or long life charcoal filter, you can choose AEG's high-performance, re-usable Ultra Charcoal Filter. This simply needs to be refreshed in the oven every 3-5 months (you'll find full instructions on how to do this in the user manual included with the filter).

Motor ·

Charcoal filter · · · · · · · · · · · · · · · · · · ·

Frame ·

Large grease filters ·
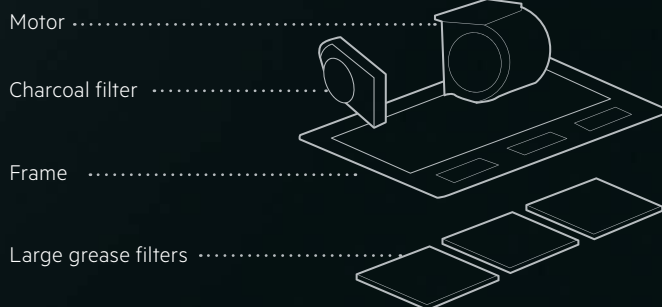

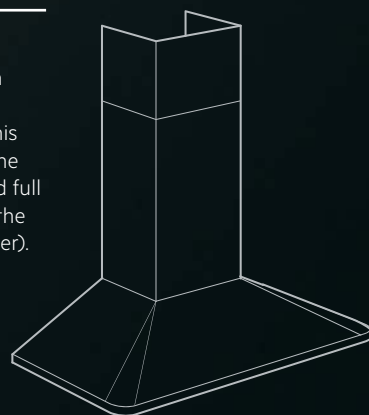

Ultra Charcoal Filter
A charcoal filter effectively reduces smells in the kitchen, with a fast odour dispersion time. This type of filter, with its distinct hexagonal shape, can 'regenerate' rather than needing to be replaced.
Once treated, it is easy to re-install.

HOODS | DBB5960HM

A FRESHER KITCHEN, HANDS FREE

The AEG **Hob²Hood** adapts to your cooking to keep your kitchen free of steam and vapours without you even having to touch it.

As you cook, the hood activates automatically, monitoring the fluctuating heat and steam of every simmer and boil, effortlessly maintaining the freshness of your kitchen. Your attention stays, as it should, on preparing, finessing and enjoying your dish.

A design hood that efficiently cleans the air in your kitchen, thanks to the powerful energy efficient motor. This hood is a chimney model and gives your kitchen a strong design statement.

DISHWASHERS

It's not just about the food – the style of cutlery and plates affect our perceptions of what we eat. A dark chocolate dish looks best when served on an angular plate, while a round plate is better for cheesecake. So you need a range of tableware that complements your food presentation and can be cared for in the most efficient way.

Superior cleaning and drying
Unrivalled coverage,
absolute clean and care.

Adaptability
Conveniently on time.

Comfort
Lifts gentle to a new level.

DISHWASHERS WHAT'S NEW

WORLD'S FIRST 1

The ComfortLift® dishwasher is the first of its kind to gently slide the lower basket up for easy, ergonomic loading and unloading.

ComfortLift®

- Lower rack lifting mechanism, reduces the need to bend loading and unloading your dishes.
- 25cm rack elevation compared to a standard dishwasher.*
- Tested for 20.000 cycles with full standard loads (18kg).

*Excluding height from floor

25cm
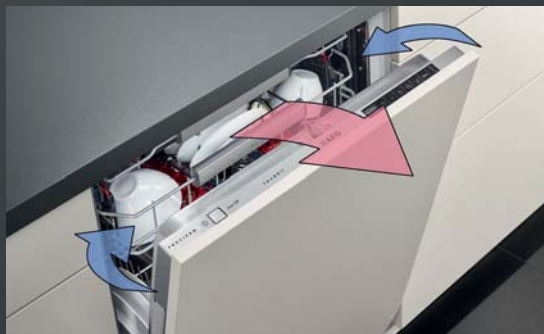

AirDry technology
Uses natural airflow to finish the drying. By automatically opening the door by 10cm in the last part of the cycle, you will get maximum drying performance while effectively reducing your energy costs – leaving your dishes spotless.

Delay time
Allows you to select when the machine should start.

TimeSaver
50% less time thanks to increased power speed and water pressure.

Extra silent
Low noise and minimal disturbance.

ComfortRails
Smoothly slide the basket into place without any rattle of the plates. Always smooth to load and unload. You never have to worry about any chips or cracks in your dishes.
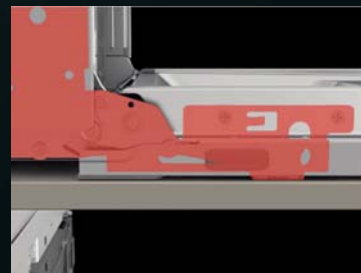

Sliding hinges
Allows you to install the dishwasher with any door length without the need to cut the kitchen plinth. This is also suitable for plinthless kitchens. The best solution on the market – patented by AEG.

DISHWASHERS WORTH KNOWING

The multiple double rotation of the Satellite Spray Arm sprays from continuously varying angles, leaving your dishes and cookware gleaming.

Standard spray arm coverage

versus

Satellite spray arm coverage

Removable cutlery tray
Take your tray with you to the kitchen cutlery drawer for easy unloading. Best in class solutions for easy loading and unloading.

Without

With SoftGrips and SoftSpikes®

Safer protection for delicate glasses
The SoftGrip mechanism is both secure and gentle while resting on the SoftSpikes®, so there's no need to hand-wash glasses any more.

15 place settings
Our dishwasher is designed to offer far more capacity than a standard one, with the flexibility to fit all types of loads. The cutlery tray is placed in the top of the machine, rather than a cutlery basket placed on the lower rack, freeing up the bottom level to fit more in. Our new dishwasher can fit 15 place settings.

Glass Care Programme
Special 45ºC glass programme assures perfect washing results while protecting your most precious glass, crystal and china.

COMFORTLIFT® | FSS62800P

LIFTS GENTLE TO A NEW LEVEL

The AEG **ComfortLift®** dishwasher is equipped with a special lower rack lifting mechanism, ensuring less bending when unloading the dishes to make your life more comfortable.

Fully Integrated A++ energy rated 13 place setting ComfortLift dishwasher.

This ComfortLift dishwasher has a special lower rack lifting mechanism, making loading and unloading the dishwasher less of a chore.

Achieve impeccable cleaning, whatever the load, with five spray levels, satellite spray arm and a third ceiling spray arm.

AirDry technology provides perfect drying results by opening the door 10cm automatically during the drying cycle, providing natural air drying.

The XXL interior of this dishwasher gives you an additional 10litres of space, more capacity for those irregular shaped items.

The TimeSaver function allows additional flexibility, with the option to reduce programme cycle times by up to 50%.

IMAGINE

Imagine putting your precious sweater in the washer. Imagine trusting a silk dress to a dryer.

We've not only imagined it, we've done it. Washed the black dress time after time. Dried a soft wool sweater over and over. Every time they emerge without shrinking or fading, still vibrant and soft. Because AEG has redefined what a washer and dryer are. Protectors of fabric. Defenders of colour. Guardians of fibres.

Unprecedented care for the life of your clothes.

IMAGINE THAT.

DESIGNED WITH CARE

Our unique, innovative design
is more than a pretty face.
It also conveys superior quality
and technical advancement.
For our new range, we redefined
the door's design for greater
visibility and reinvented
the control panel. Just turn
the dial for an exceptional,
first-touch experience.

Premium door finish
Inspired by the electric turbines
manufactured at the AEG
Turbine Factory in Berlin.

Balanced design
A symmetrical Germanic design
with a central dial to balance
the control panel.

Focus dial
Real stainless steel insert on
the control panel and a premium
metal coating on the dial
with a distinct physical and
auditory 'click' feedback.

9000 SERIES

MEET THE LITTLE BLACK DRESS GUARDIAN

While conventional washing machines need high temperatures to activate detergents and clean properly, the SoftWater Technology in AEG 9000 Series washing machines purifies and softens water before it enters the drum. So detergents can work at their best, even at the lowest temperatures.

8000 SERIES

MEET THE COMPLETE FIBRE GUARDIANS

Clean and care for every fibre and tumble dry every delicate stitch. Only the AEG 8000 Series with ÖKOMix Technology and AbsoluteCare® System delivers care so gentle it's like hand-washing and flat-drying your softest, most delicate garments – from woollens to high-performance outdoor gear, every time.

7000 SERIES

MEET THE GENTLE TEXTURE PROTECTORS

A sharp shirt immaculately washed and finished with steam to reduce wrinkles. A sheer blouse perfectly tumble dried with just half the temperature of a conventional dryer. AEG 7000 Series laundry Systems bring together ProSteam® and SensiDry® Technologies to protect texture and reduce wear, achieving impeccable results the gentlest way.

6000 SERIES

MEET THE EVERYDAY QUALITY PRESERVERS

Your everyday clothes look like new, for longer. The AEG 6000 Series laundry systems use ProSense® Technology to save energy and time with even the smallest load. Making sure your clothes are never over-washed, never over-dried. Preserving everyday quality, day in, day out.

9000 SERIES | WASHING MACHINE

PROOF POINTS

NO FADING, WASH
AFTER WASH*

Softer water, kinder to clothes
Because our advanced SoftWater Technology purifies and softens water before it enters the drum, detergents can work much more effectively at low temperatures, delivering 60°C cleaning performance at only 30°C. So colours will keep their intensity wash after wash, and black won't fade to grey.

All mains water contains minerals that can be harsh on fabrics. These AEG washing machines are the first in the world with SoftWater Technology to remove these impurities. The ion-exchange filtering system optimises the water entering the drum for detergents and softeners to work at maximum efficiency, even at the lowest temperatures. Gentle enough to keep fabrics feeling soft and colours looking their absolute best.

*Test for colour-fastness performed on black polyester after 50 washing cycles at 30 degrees.

9000 SERIES | L9FEC966R

IT'S THE LITTLE BLACK DRESS GUARDIAN

No fading wash after wash*.

Imagine a washing machine that you can trust to keep your colours as vibrant and blacks as true as the day you bought them. Yet never compromising on cleaning performance. Washing deeply. Thoroughly. Every time. At last, there is no need to compromise performance for care.

While conventional washing machines need high temperatures to activate detergents and clean properly, the SoftWater Technology in AEG 9000 Series washing machines purifies and softens water before it enters the drum. So detergents can work at their best, even at the lowest temperatures. For the first time ever, you'll achieve the thorough clean of a 60 degree wash at just 30 degrees. Maintaining the colour, shape and feel of every garment. Wash after wash. It's more than a washing machine. It's the guardian of your clothes.

8000 SERIES | L8FEC966R

INTRODUCING THE DELICATE SHIRT DEFENDER

Every fibre protected.

Faultless fabric never goes out of style. Your delicate pieces need to be treated gently to ensure that their quality is timeless, no matter how often you wear them. To achieve this, AEG 8000 Series washing machines with advanced ÖKOMix Technology blend detergents and then softeners with water before they enter the drum. In other washing machines, less than half of the fibres are reached by softeners. ÖKOMix Technology guarantees that, for the first time ever, every fibre is cleaned and cared for, even with shorter cycles. Every thread, every stitch, every fibre. Expertly protected.

INTRODUCING THE SHARP SHIRT DEFENDER

Cuts creases by up to one third*.

Maintaining your professional look day to day should be effortless. AEG 7000 Series washing machines keep shirts looking sharp, whilst cutting down on ironing. ProSteam® Technology allows you to complete a washing cycle with steam to reduce wrinkles or use a separate steam programme to refresh clothes without washing them. Not only saving you time, but also reducing the need for dry cleaning. Less ironing means less wear and tear on fibres, maintaining their look and feel for longer. Keeps your clothes looking and feeling impeccable, every day.

6000 SERIES | L6FBG142R

MEET THE EVERYDAY CLASSIC PRESERVER

Cares twice as effectively*.

Quality clothes are made to be worn, but everyday pieces need care to maintain their condition. In AEG 6000 Series washing machines, every load is measured to tailor each cycle and calculate just the right amount of water and energy the wash requires. Whether you wash one shirt or a full load, the washer will adjust accordingly, reducing wear and tear by taking the minimum amount of time necessary for a thorough clean. And reducing water, energy consumption and washing time for smaller loads. AEG washing machines keep clothes looking their best. Every wear, every wash.

8000 SERIES | T8DEC946S

IT'S THE WOOL SWEATER GUARDIAN

Never dared to tumble dry wool, silk or outdoor garments before? Now you can tumble dry everything you wash. From the softest wool sweater to the business shirt you wear every day. Dryers with the AbsoluteCare® System have tailored programming to control precisely the movement and temperature of the drying drum. Holding delicate fibres aloft so silks keep their shape and wrinkles are reduced.

AbsoluteCare® System: redefining tumble drying for every fabric in your wardrobe. You can also use the new Outdoor Programme to restore water protection of outdoor garments better than air drying. The intelligent wool programme adapts the rotation used for treating hand-wash woollens so there's no shrinkage.*

INTRODUCING THE SHEER BLOUSE PROTECTOR

Tumble dryers once meant high heat. And high heat is something your clothes should never be exposed to. Your knitwear, cotton tees, business shirts – clothes you wear day in, day out - need special care to keep them feeling special. AEG SensiDry® Technology dries the fabrics at half the temperature of conventional tumble dryers, without significantly extending the drying time. Ensuring that garments are never subject to unnecessary heat. Reducing wear and tear. Helping to make sure that the clothes you wear often, look and feel like new, every day.

KEY FEATURES

2 YEAR GUARANTEE

ProTex®

Achieve the drying result you require, with sensor programmes that automatically switch off when your clothes are dry to ensure perfect fabric care.

An extra large drum featuring three lifters and reverse tumble action ensures uniform drying. After the drying cycle has finished, the Anti Crease option intermittently rotates your clothes to reduce creasing.

With a delay start of up to 9 hours, you can programme the machine to finish the cycle when it is most convenient for you.

*This model does not have the Quiet Mark award.

8000 SERIES | L8WEC166R

EVERY FIBRE PROTECTED IN ONE GO.

Classics stand the test of time, outlive trends and provide an integrated solution for looking sharp. The same as the new Kombi washer dryer with ÖKOMix Technology. It's the only machine on the market that pre-mixes detergents and softener separately in water before they enter the drum. Meaning they are activated before they reach fabrics, preparing clothes for the most thorough clean and the most even dry. Resulting in every fibre being reached. And every fibre receiving complete protection. All in one go. And all in less time thanks to the ÖKOPower NonStop programme that washes and dries 5kg in four hours. Allow us to introduce you to the defender of your classics.

(HxWxD) in mm
870 x 600 x 605

Specifications
Capacity: 10kg/6kg
Spin Speed: 1600rpm
Energy rating: A

aeg.co.uk/care

KEY FEATURES

ÖKOMix Technology
Unique pre-mixing of detergent, softener and water to reach every fibre.

DualSense® Technology
Adapts the temperature and movement of the drum to different types of fabric ensuring that every garment, from delicates to outdoor wear, retains its shape and integrity.

ProSense® Technology
Protects clothes from the wear and tear caused by excessive washing and drying. Automatically adjusts time, water and energy consumption to suit any load size.

A COMPLETE TREATMENT FOR OUTDOOR WEAR IN ONE GO.

Some specialist clothing – waterproofs, woollens – require specialist care. Which is where the intelligent system in our new Kombi washer dryer comes in. Drawing on the best DualSense Technology, it tailors the temperature and motion of the drum to different fabrics. Unlike other machines, the programme is adjusted according to the specified load, so that everything from textured jackets to soft jumpers can be carefully washed, dried and cared for in one go. For outdoor wear, functionality can be retained and restored, from water repellency to breathability. For delicates like handwash-only woollens*, tactility can be sustained, removing the need to filter fabrics between processes. Meaning no more dry-cleaning. And no more handwashing. Just the convenience of an integrated and complete treatment. Meet the restorer of your performance wear.

2 YEAR GUARANTEE

*Woolmark Blue Certification in both washing and drying.

7000 SERIES WASHER DRYER
L7WEE965R

KEY FEATURES

DualSense™

AEG washer dryers are the only washer dryers with Woolmark Blue accreditation in both the wash and the dry wool cycle, meaning that even your handwash only woollens are cared for from start to finish.

Refresh and deodorise your clothes quickly, and reduce wear and tear caused by overwashing with our built in steam function. Ideal for once worn items. Alternatively, use a steam programme to reduce creasing and cut down your ironing time.

Reduce creasing and cut down your ironing time using the Anti-crease option. This option intermittently rotates your clothes at the end of the programme to reduce wrinkling.

HEAT PUMP WASHER DRYER
L99695HWD

KEY FEATURES

5 YEAR GUARANTEE

SensiDry OptiSense ProSteam

The ÖKOKombi washer dryer uses heat pump technology in the drying phase. Drying takes place at very low temperatures compared to a standard washer dryer, ensuring the gentlest drying possible.

OptiSense ensures the best treatment for every garment by providing a cycle tailored to load size. Sensors adjust washing and drying times to avoid overwashing and overdrying.

Special steam programmes can be used to dewrinkle or refresh your clothes and are a good alternative to dry cleaning.

*This model does not have the Quiet Mark award.

ENERGY INFORMATION / EU ENERGY EFFICIENCY INFORMATION

This scheme, which covers refrigerators, freezers, washing machines, tumble dryers, dishwashers and electric ovens is designed to offer consumers a standardised method of choosing the most energy efficient appliances.

For refrigerators and freezers, as well as stating the energy efficiency class (A+++ - most efficient, 'D' - least efficient) the label also gives the annual electricity consumption (i.e. running cost) freezing capacity, noise level and the usable storage capacity.

For dishwashers, as well as stating the energy efficiency class (A+++ - most efficient, 'D' - least efficient) the label also states the annual water consumption (lts), drying efficiency, place settings and noise level.

For washing machines, as well as stating the energy efficiency class (A+++ - most efficient, 'D' - least efficient) the label also states the annual water consumption (lts), load size (kg), spin speed efficiency and the washing & spinning noise levels.
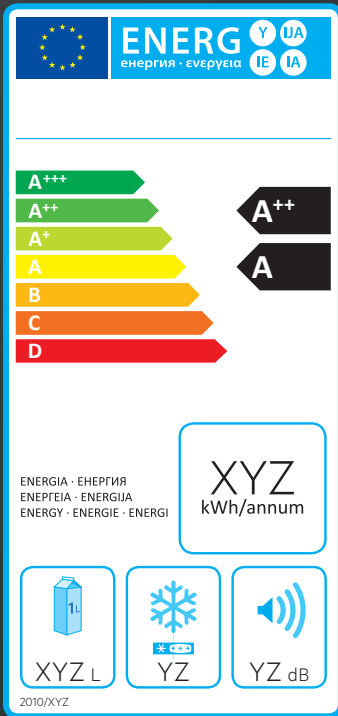

Example of refrigeration energy label.

Example of dishwasher energy label.

Example of washing machine energy label.

For electric ovens, as well as stating the energy efficiency ('A' - most efficient, 'G' - least efficient), the label also states the energy consumption (in kWh) and the usable volume of the oven. If the oven is a double oven it will carry this information for both ovens.
